EXTON, Pa., Feb. 1, 2017 /PRNewswire/ — Booth #H26 — [West Pharmaceutical Services, Inc.](#) (NYSE: [WST](#)), a global leader in innovative solutions for injectable drug administration, today introduced two new offerings at [Pharmapack Europe 2017](#). The LyoSeal® cap, an all-plastic, instant sealing solution for lyophilized drug products, is designed to minimize risk associated with established lyophilization processes, while maintaining the necessary sealing requirements. The NovaGuard® SA Pro safety system, which is pending 510(k) clearance in the United States, aids in the protection of healthcare professionals, patients who self-inject doctor-prescribed medications, and individuals who assist self-injecting patients, from accidental needlesticks. These innovations, along with West’s high-value product portfolio and leading scientific insight, will be showcased at the West Pharmapack booth, February 1-2, 2017, in Paris, France.

“We appreciate and understand that in today’s healthcare environment, our customers are continually looking for new packaging solutions that offer manufacturing efficiencies, as well as products that provide an improved experience for healthcare providers,” said Karen Flynn, Senior Vice President & Chief Commercial Officer, West Pharmaceutical Services, Inc. “As part of our ongoing commitment to our customers and their patients, we’re pleased to introduce LyoSeal and NovaGuard SA Pro—two products that directly respond to market needs. We look forward to showcasing these offerings—along with West’s breadth of scientific and regulatory expertise—to attendees at Pharmapack.”

West’s NovaGuard SA Pro safety system helps protect healthcare workers and patients from accidental needlestick injury. The NovaGuard SA Pro system can be deployed using a single-handed technique and was designed to prevent pre-activation during handling. The system is compatible with ISO 1mL long glass-staked needle syringes and is transparent for ease of drug inspection and delivery. Furthermore, the device design facilitates easy assembly of a glass pre-filled syringe with very minimal change parts and changeover time to existing assembly equipment.

In addition to sharing more about these innovative products, experts from West will present on important industry topics during scientific and educational conference sessions:
